

# NASA Space Apps Noida 2024

World's Largest Space & Science Hackathon

5-6th October 2024 | 36 Hours Hackathon

Innovation partner **I2S**

## TEAM DETAILS :

- a. Team name: **Tech Grades**
- b. Team leader name: Bhaskar Raj
- c. Problem Statement: **PACE IN THE CLASSROOM**

## BRIEF ABOUT THE IDEA :

- The brief about our idea is that we are creating a website or an publically accessible app of set of info about pace which can be helpful for students across the world.
- To make the sophisticated data collected by NASA's PACE satellite accessible and comprehensible to students.
- Simplifies complex information, allowing students to engage with and understand important environmental data.

## 1. UNIQUE IDENTIFICATION :

- Unlike generic educational tools, this approach leverages real time satellite data, offering students direct access to the scientific research and technology. Provides us with the Hands-on-Learning experience.

## 2. SOLUTION TO THE PROBLEM :

- In this we are going to integrate complex data of the PACE satellite into a simpler form with the help of advanced technologies and by creating a user-friendly interface.

## 3. UNIQUE SELLING PROPOSITION :

- Empowering students with embracing technologies and real world applications to deepen understanding of climate science and hands-on ocean literacy education.

## ASPECTS OF THE SOLUTION:

### ➤ EDUCATIONAL CONTENT :

Incorporates up-to-date PACE satellite data , accurate information for high school students and public in a effective and user-friendly manner.

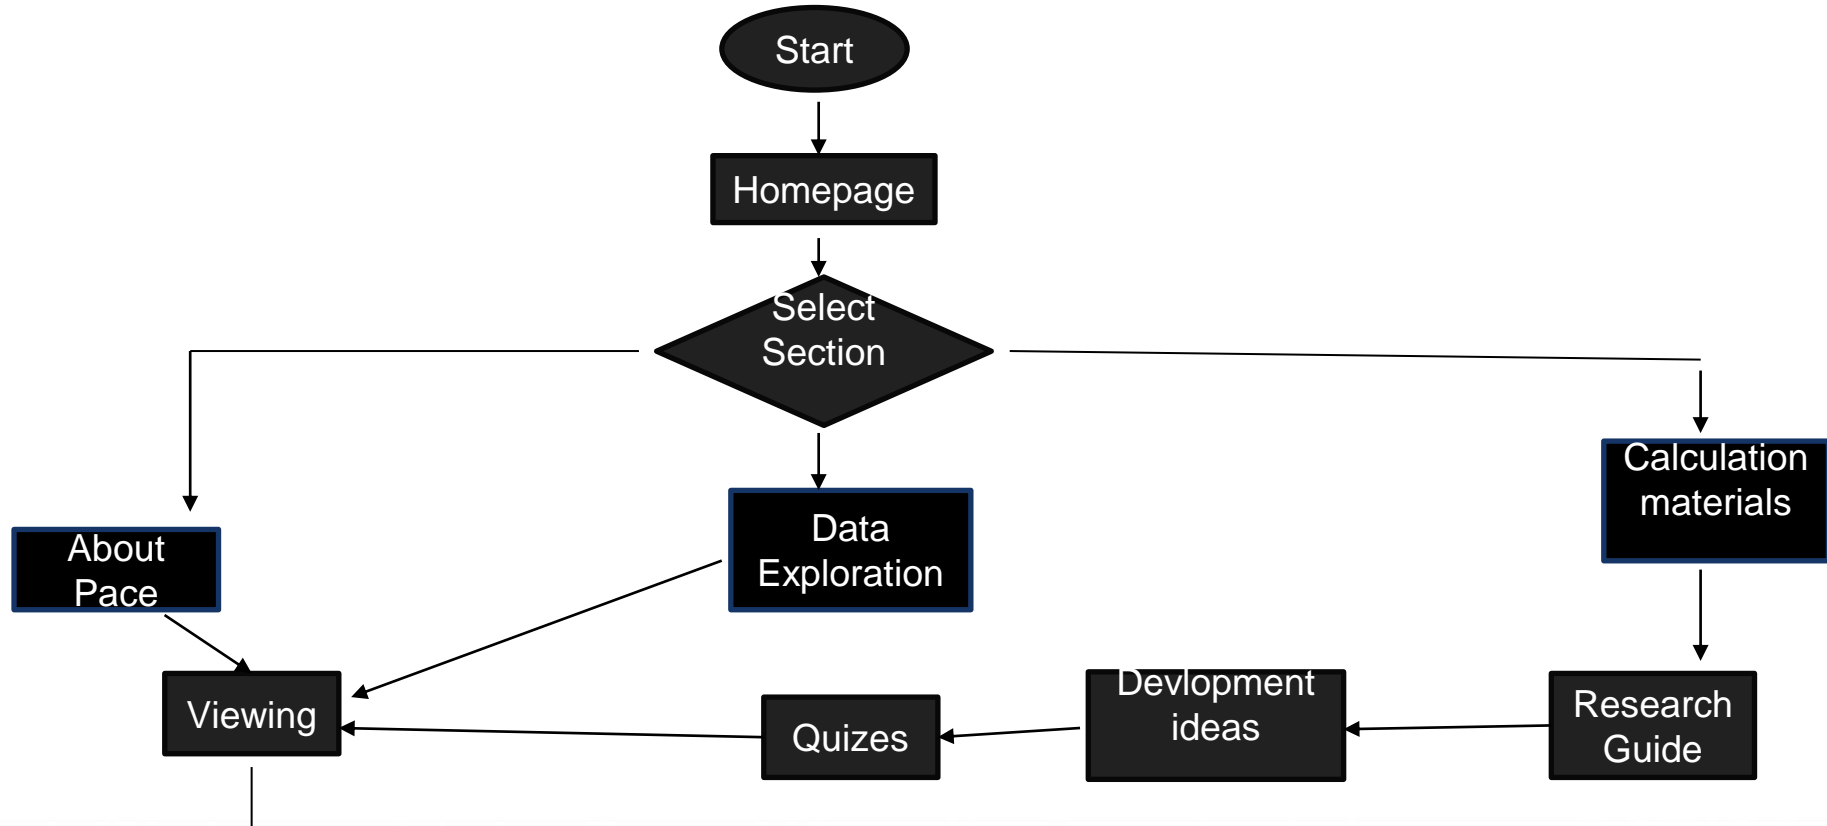

### ➤ RESOURCE LIBRARY :

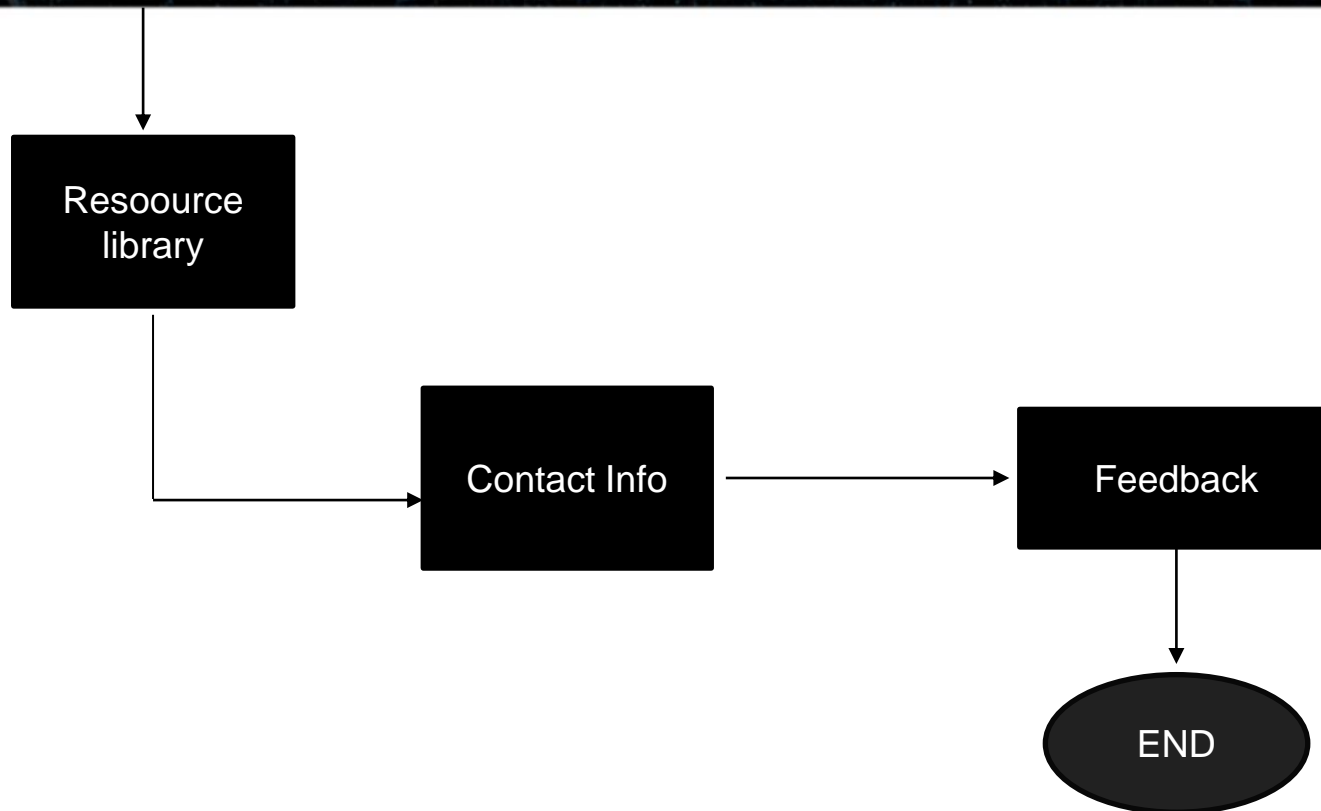

Provide the data that can be downloaded and stored in a bulk for engagement with normal public.

### ➤ DISCUSSION FORM :

Used to collect data from the user and also it help us with feedbacks and real time data from different generic applications.

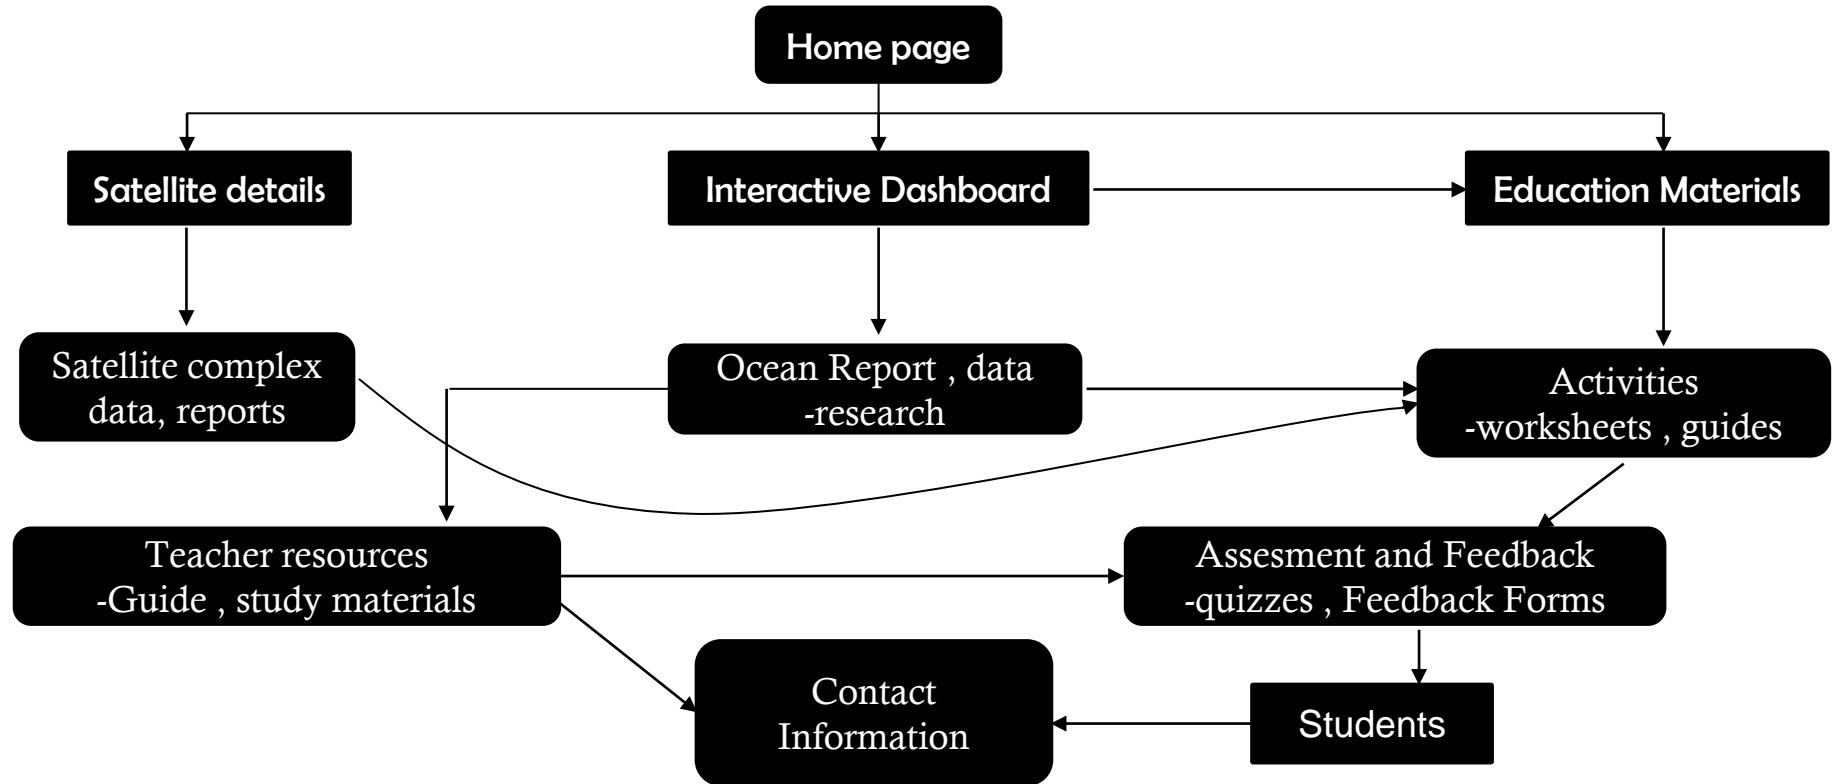

## Process flow diagram or Use-case diagram

## ARCHITECTURE :

## TECHNOLOGIES :

### ➤ Front end :

Html : For making skeleton of websites.

Css : For styling the website.

Java Script : For giving specific positions.

### ➤ Back end :

Note js : For real time data handling.

Python : Handle large datasets generated by pace sattelites.

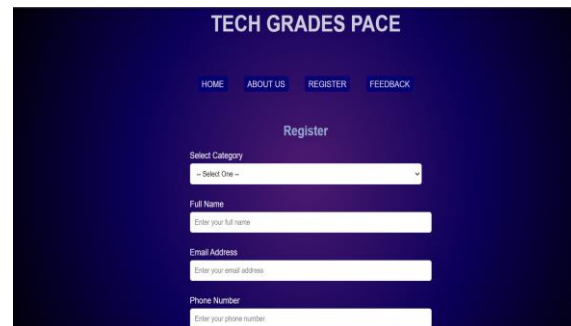

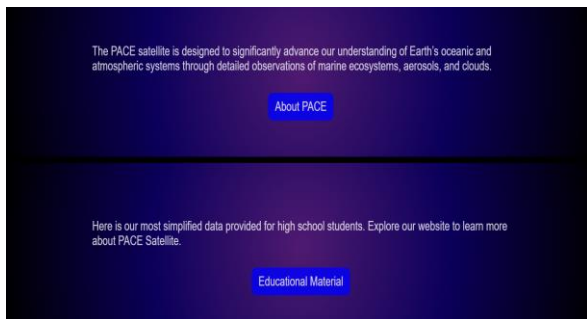

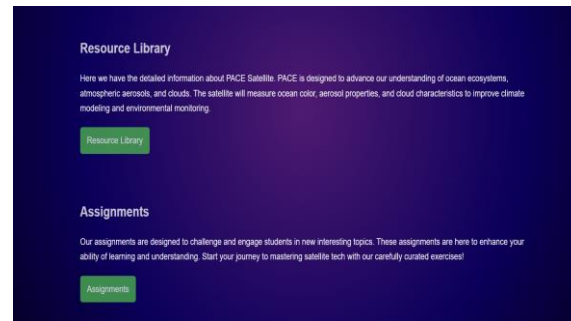

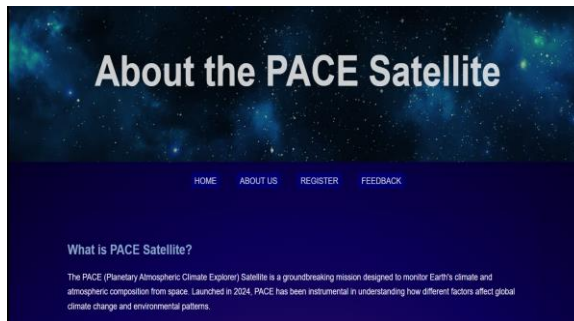

Restful APIs : can provide the structured data.

### ➤ Data management :

My Sql : For handling unstructured user data.

## Snapshots of the prototype

## FOR FUTURE DEVELOPMENT :

- Partnership with external projects.
- Social media involvement for research.
- Time to time security up gradation.
- Direct students to teacher conversations will be their.
